SUMMARY

Reporting analyst with a background in Geographic Information Systems, bringing hands-on experience in spatial modeling, Power BI forecasting, SQL data pipelines, and client-facing analytics. Skilled at translating complex location and marketing data into tools and insights that drive real decisions.

WORK EXPERIENCE

Reporting Analyst II

VOGLIO Digital Marketing · Seattle, WA · July 2024 – Present

- Design and maintain client-facing Power BI dashboards — including a logarithmic cohort-based conversion forecasting model ($R^2 = 0.97$) — translating marketing data into actionable insights.
- Built an end-to-end spatial analytics pipeline combining ArcGIS and Power BI to map customer locations relative to clinic sites across multiple states, optimizing geographic ad targeting.
- Developed automated SQL validation framework comparing Google Sheets categorization against production Redshift tables, flagging discrepancies before they reached client dashboards.
- Collaborate cross-functionally with analysts, data engineers, and performance marketing teams to uphold QA standards and resolve data pipeline issues across multiple client accounts.

Workday Security Analyst Intern

University of Washington Information Technology · Seattle, WA · Jan – May 2024

- Managed security role changes and access provisioning across multiple Workday tenants for a large university user community.
- Analyzed domain security policies and business process architecture to improve configurations and meet internal audit requirements.

Data Operations Intern

PitchBook Data · Seattle, WA · June – August 2023

- Identified patterns and gaps in large private-equity datasets; presented findings that influenced future data-sourcing strategies.
- Built and maintained accessible databases for investor audiences, strengthening data collection and management workflows.

Research Analyst

Data Science for Sustainable Development (DSSD) · Remote · June – August 2022

- Conducted geospatial analysis for peacebuilding and humanitarian fieldwork; built the interactive GIS for Peace database (ArcGIS Online, Survey 123, Excel) — live at gis-4-peace-dssdglobal.hub.arcgis.com.

EDUCATION

Master of Science, Geographic Information Systems — Geospatial Intelligence

University of Idaho · Moscow, ID · Expected May 2026 · GPA 4.0 / 4.0

Capstone: "Beyond Burned Area: The Role of Atmospheric Transport in Wildfire Smoke Exposure Across Washington State (2020–2024)" — atmospheric transport modeling + ArcGIS Experience Builder.

Bachelor of Arts, Geographic Information Systems · Minor: Data Science

University of Washington · Seattle, WA · June 2024 · GPA 3.7 / 4.0 · Dean's List (9 quarters)

SKILLS

Geospatial	ArcGIS Pro / Online / Experience Builder · ArcPy · QGIS · Spatial Statistics · GWR & KDE · Survey123 · Cartography
Business Intel.	Power BI · DAX & Power Query · Forecasting Models · Dashboard Design · Tableau
Programming	Python · R / R Studio · SQL · JavaScript · Excel & Power Automate
Data	Data pipelines · QA automation · Redshift · Spatial database management · Data storytelling
