

Grace Harrill

Data & Reporting Analyst · GIS & Spatial Analytics

Seattle, WA · gracie.harrill@gmail.com · (509) 850-7344 · [LinkedIn](#) · gracieharrill.github.io/grace-harrill-portfolio

SUMMARY

Data and reporting analyst with an M.S. in Geographic Information Systems (Geospatial Intelligence) and hands-on experience across ArcGIS Pro, ArcGIS Online, Python, and Power BI. Skilled at building spatial analysis pipelines, QA/data validation workflows, and interactive dashboards that turn complex data into clear, decision-ready insights for both technical and non-technical stakeholders.

SKILLS

Geoprocessing & Analysis: ArcGIS Pro, ArcGIS Online, ArcGIS Experience Builder, ArcPy, Spatial Analysis & Modeling, Spatial Statistics (GWR & KDE), Cartography

Automation & Scripting: Python (ArcPy, workflow automation), SQL, Git, recurring data-processing pipelines

Dashboards & Reporting: ArcGIS Dashboards, Power BI, Tableau, Excel & Power Automate, Data Storytelling

QA/QC & Data Management: Data validation pipelines, database QA, data schema troubleshooting, Redshift · MS Word, Excel

Field Data Collection: Survey123, crowdsourced field data integration

WORK EXPERIENCE

Reporting Analyst II — VOGLIO Digital Marketing, Seattle, WA *July 2024 – Present*

- Built an end-to-end spatial analytics pipeline combining ArcGIS and Power BI to map customer locations relative to clinic sites across multiple states, using ArcGIS drive-distance analysis to define service zones and visualize geographic density — direct experience running geoprocessing analysis to produce client-facing deliverables.
- Built SQL validation pipelines using Power BI and Redshift to catch data discrepancies before client reporting, and automated recurring data-processing workflows in Python.
- Diagnosed and corrected calculation logic producing inaccurate forecasts and designed a logarithmic forecasting model in Power BI to predict long-term cohort conversion rates, validating results against real performance data.
- Automated a weekly Power Automate reporting pipeline that queried Power BI datasets via DAX and transformed raw query results into dynamic HTML tables, eliminating manual report building.

Workday Security Analyst Intern — University of Washington Information Technology, Seattle, WA *Jan – May 2024*

- Managed security role changes and access provisioning across multiple Workday tenants for a large university user community.
- Analyzed domain security policies and business process architecture to improve configurations and meet internal audit requirements.

Data Operations Intern — PitchBook Data, Seattle, WA *June – August 2023*

- Partnered with data analysts to QA source records against internal standards and built accessible databases for end users, strengthening data collection, organization, and management workflows.

Research Analyst — Data Science for Sustainable Development (DSSD), Remote *June – August 2022*

- Conducted geospatial analysis for peacebuilding and humanitarian fieldwork; built the interactive GIS for Peace database (ArcGIS Online, Survey123, Excel) — live at gis-4-peace-dssdglobal.hub.arcgis.com.

PROJECTS

VacantWatch — Full-Stack Geospatial Web Application — Independent Project, *In Progress*

- Building a web application that integrates county parcel, assessor, GIS, and tax data from ArcGIS REST services and public open-data APIs into a single interactive map, currently supporting King and Spokane County.
- Designed a provider-based architecture so new counties can be added without rebuilding the application, addressing the challenge of inconsistent GIS data structures across jurisdictions.
- Implemented safeguards for large geographic queries, caching, error handling, and automated smoke tests.

EDUCATION

Master of Science, Geographic Information Systems — Geospatial Intelligence

University of Idaho · Moscow, ID · May 2026 · GPA 4.0 / 4.0

Capstone: "Beyond Burned Area: The Role of Atmospheric Transport in Wildfire Smoke Exposure Across Washington State (2020–2024)" — atmospheric transport modeling built and visualized in ArcGIS Experience Builder.

Bachelor of Arts, Geographic Information Systems · Minor: Data Science

University of Washington · Seattle, WA · June 2024 · GPA 3.7 / 4.0 · Dean's List (9 quarters)
